Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant submitted amendment and discussed differences between amended claims and cited references. Applicant argues that the prior art of record fails to teach "a projection optical system that projects a pattern formed on a first object onto a second object using EUV or X-rays passing through a vacuum in which there is a diaphragm and a colling device which removes heat absorbed from the scattered EUV or X-rays by the diaphragm during projection of the pattern". The Examiner understands and appreciates the distinctions as described, and will give them full consideration in the next office action.
